

FINISHING TOUCHES

FOR YOUR HOME

Transform Your Space with Finishing Touches...

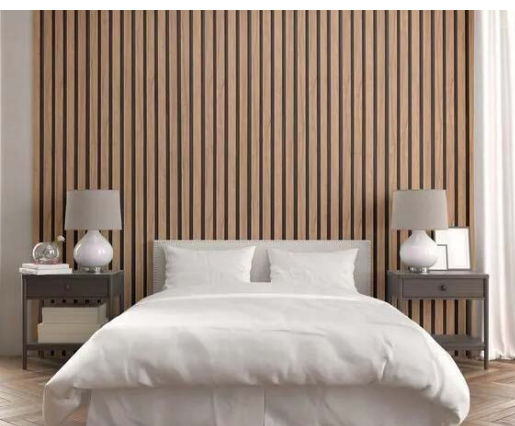

OUR STYLISH, SLATTED WALL PANELS ARE PERFECT FOR ADDING A TOUCH OF NATURAL BEAUTY TO ANY ROOM...

All our wall panels are manufactured from high density polystyrene by a process known as extrusion. The décor layer is a foil and is heat fused into the substrate. Our wall panels are manufactured from 95% recycled material.

FEATURES

- 100% Waterproof
- Eco-Friendly
- Quick and Easy to Install
- For Internal Purposes only
- High Quality Finish
- UV Protection Layer
- Insect Proof
- Zero Maintenance
- Long Lasting
- Will Not Warp
- Cable Trunking Of 6mm
- Light Weight
- Consistent Colour

CALCULATE HOW MANY PANELS YOU NEED

WHEN CALCULATING THE QUANTITY OF WALL PANELS NEEDED IT IS ALWAYS BEST TO CALCULATE IN LINEAR METERS AND NOT SQUARE METERS.

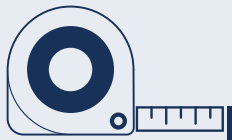

WHY?

Because in most cases a 2400mm length (2.4 meter) will cover the wall, from floor to ceiling, and will not need to be cut. Please note the calculation is done less the overlap to get the exact number of pieces needed. The size of the panel on the product label is the total size.

EASY INSTALLATION

1

Measure the area you would like to place your panels on. Calculate how many panels you will need.

2

If required you can cut the panels to your preferred length using a jigsaw with a PVC Cutting blade.

3

Use High Tack Adhesive to glue the wall panels directly onto your wall.

DO'S & DONT'S

- For Internal purposes only
- Can be installed under covered patios.
- Must use a High Tack Adhesive for installation
- Use a spirit level to install straight
- Use a PVC blade if cutting with a jigsaw
- Use masking tape when cutting.
- If there is a small space left after installation you can slightly move and position the panels to cover this space.
